DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-7, drawn to a computer processor with a plurality of functional units, classified in class 712, subclass 226.
- II. Claim 8-17, drawn to a method of selling partially defective processor integrated circuits, classified in class 714, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as being a computer processor that is not to be sold. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Repeated telephone calls, including a voice message were made to Peter Knobs during the week of November 15th to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne L Damiano whose telephone number is (571) 272-3658. The examiner can normally be reached on M-F 9-6:30 first Fridays off.
